

SEA-90

Full Spectrum Fertility
from the ancient ocean

Unrefined Mined Minerals
100% Natural
100% Natural & Water Soluble
includes Trace Elements
OMRI Listed™
for Certified Organic production

Sea Energy in Agriculture

SEA-90 is **Dr. Maynard Murray's Sea Solids**. Thirty years of research by Dr. Murray proved that soils enhanced with a **full menu of 90 marine minerals** grow crops superior to those grown conventionally.

SEA-90 is **100% natural, water soluble, non-synthetic mined minerals** listed by the Organic Materials Review Institute (OMRI) for use in production of organic food and fiber. **SEA-90** quickly dissolves to disburse the sea's **full spectrum of minerals and trace elements** into the soil. A thorough rain or watering easily dissolves these crystals. Or spray or mist onto foliage and soil.

SEA-90 is the **only 100% water-soluble fertilizer** containing the sea's perfectly balanced nutrients and elements in a readily available form. When H₂O is extracted from seawater, 3.5% remains as solids—minerals in their simplest elemental form. Significantly, the elements in seawater are in the same ratios as **human blood**. This **natural, full spectrum menu of minerals and trace elements** is in perfect proportion and balance to sustain **optimum biological life**.

SEA-90 is obtained from tidal pools in a select area of desert seacoast that meet **Dr. Murray's** stringent criteria for purity and proportion. At high tide, mineral-rich seawater floods tidal pools that slowly dry into **crystals** with elemental composition identical to seawater.

SEA-90—Dr. Maynard Murray's Sea Solids—is provided exclusively by **SeaAgri**. Dr. Murray's knowledge is shared in his book **Sea Energy Agriculture**, and Charles Walters' **Fertility From The Ocean Deep** (available from Acres USA).

SeaAgri is honored to supply **SEA-90** to **Soil Stewards**—growers who sustain maximum soil fertility to produce the highest quality crops, seeds, feeds, and foods to deliver optimum health and vitality to humans, animals, and all life on our planet.

Recycle the Sea

The Sea: Cradle of Life Earth's most ancient solution

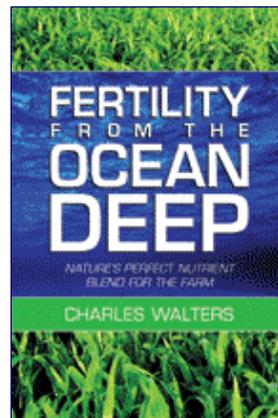

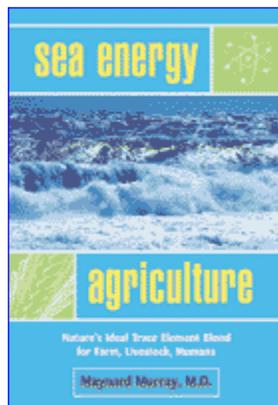

The Ocean gave birth to life on Earth. Over two billion years ago, the first simple bacteria appeared in Earth's early seas. Throughout geological history, the seas were the primary reservoirs of life as evolution advanced and regressed through the ages. Today, the seas are the cradles of life. Earth's greatest sanctuaries of biodiversity are the seas.

SEA-90 is natural crystal from seawater. These simple salts are not refined, purified or processed in any way that alters their original nature. The crystals contain all **90 elements found in seawater**. Only a few gases and volatile elements are missing. **All Elements required to sustain life are present**.

SEA-90 is unlike other soil fertilizers. It is **not** a simple single-metal salt, such as sodium chloride, magnesium sulfate, or calcium carbonate. **SEA-90** is a **balanced blend** of sea nutrients, including the **major minerals, minor minerals and trace elements**—even rare metals like silver, gold, platinum, and ytterbium.

In the Ancient Sea, all creatures—from simple kelps and corals, to shellfish, fish and marine mammals—share direct access to these **full-spectrum elements** dissolved in the ocean. Every element and nutrient necessary to sustain healthy biological life is readily available in their **natural balance** as seawater.

Soil Science Pioneer

Maynard Murray M.D.

Medical Doctor and Research Scientist

Dr. Maynard Murray was perplexed that Americans are living longer, yet chronic illness, degenerative diseases, and physiological suffering steadily increased. Dr. Murray searched for the key to improve human health. He began his medical research by studying animal species that seem to possess inherent immunity to diseases.

Dr. Maynard Murray's research led to the discovery that sea life does not suffer from cancer or other degenerative diseases. Incredibly, the only difference between life on land and that in the sea is sea life's exposure to a perfect balance of all elements in **The Periodic Table of Elements**. To study this remarkable resistance, Dr. Murray fertilized vegetables with seawater. As a result, the vegetables flourished, showed increased resistance to disease, and provided improved taste!

Dr. Maynard Murray found the secret to human health in the sea! **Seawater** contains every element in **The Periodic Table** in perfect balance. He discovered our health (or lack of) is directly linked to the **minerals and trace elements** in the foods we eat. Our soils are deficient due to erosion, leaching, and poor soil management.

For optimum health, it's imperative to renew our soils with all 90 elements in Sea Solids!
